55..... About Educators for Excellence

Dear Reader,

Since we founded Educators for Excellence (E4E) ten years ago, our mission has always been to ensure that teachers have a leading voice in the policies that impact their students and profession. Now, during the COVID-19 pandemic, educators have stepped up to lead in incredible ways, all while navigating the largest disruption to education in generations. As teachers rise to meet unexpected challenges, and persist to reach and teach students with compassion and care, listening to their perspectives is more important than ever.

During this time of mass disruption, as critical education policy decisions are being made, we need to know what teachers think about distance learning, student needs, safely reopening schools, and more. That's why we decided to conduct a new nationally representative survey of public school teachers. After we released our *Voices from the Classroom* surveys in August 2018 and January 2020, we were heartened to see that decision-makers at every level of the education system used the findings to better understand teachers' opinions and inform policy. And most importantly, E4E's members used the data to shape our local and national advocacy campaigns that have led to real change for students and teachers. Now, *Voices from the (Virtual) Classroom* builds on these findings and provides critical context during a time of unique struggle, but also unique opportunity. Now, more than ever, we need to leverage the expertise and experience of educators on the front lines to reshape our education system to better serve all students.

The pandemic has made it much harder to ignore a harsh truth: across the country, schools have long been rife with inequities and challenges that make it difficult to provide all students with the education they deserve. *Voices from the (Virtual) Classroom* shows that these inequities have only been exacerbated by the pandemic, as students from vulnerable populations face disproportionate impact. When schools do reopen, teachers will be reunited with many students who have suffered significant trauma and learning loss. And at the same time, almost half of our nation's 13,000 school districts may be forced to make the deepest budget cuts in a generation. But if educators raise our voices to articulate a vision for change, the coronavirus pandemic could catalyze a reinvention of public education that lifts up both the outcomes for students and the teaching profession.

We are incredibly grateful to the teachers across the country who participated in this survey, sharing crucial insights from their virtual classrooms. Their perspectives paint a picture of what is working, what isn't, what is needed now — and what priorities should be when we return to school buildings. *Voices from the (Virtual) Classroom* sends a clear message: teachers want to be part of innovative solutions to support their students during and after this crisis. As decision-makers consider their next steps, we hope they will listen to teachers and take action, not only to move forward from the pandemic, but also to transform education for generations.

Sincerely,

Sydney Morris and Evan Stone
Co-Founders and Co-CEOs
Educators for Excellence

Methodology

Overview

The instrument was written and administered by Gotham Research Group, an independent research firm, and conducted online from May 2 through 8, 2020, among a nationally representative sample of 600 full-time, public school teachers. Note that all survey results are presented as percentages and, due to rounding, may not always add to 100%.

Survey Sample

The survey sample is representative of the national population of U.S. district and charter public school teachers and aligns with key demographic variables of gender, region, race, ethnicity, age, years of teaching experience, school type, and subjects taught. Any E4E member participation in the survey is entirely coincidental. The data was weighted by region, age, race, and ethnicity.

Participation and Response Rate

Potential respondents were invited via email to participate in the survey. Respondents were screened to ensure they were U.S. adults over 18 years of age and currently employed full time as pre-K through grade 12 public school classroom teachers in district or charter schools. Survey invites were sent out to 4,583 prescreened education professionals; 2,977 entered the survey, and 600 qualified and completed the full survey, resulting in a response rate of 13%. The margin of error is ± 4.0 percentage points for the full survey sample and higher among subgroups.

About Gotham Research Group

Gotham Research Group is a full-service custom research and consulting firm advising nonprofit organizations, corporations, and electoral campaigns on issues of communication, reputation, and strategy. Gotham's academic research on public opinion and survey research methodology has been published in top-tier academic journals, including *Public Opinion Quarterly*, *American Political Science Review*, and *American Journal of Political Science*.

Survey Sample

The national survey sample of 600 full-time teachers is representative of the national population of U.S. district and charter public school teachers. All numbers are percentages. Due to rounding, not all percentages add to 100%.

Questionnaire and Topline Results

All of the following are the topline results from the survey questionnaire. The questions and results are grouped by themes represented in the findings and do not necessarily appear in the order that they were asked.

NOTES

All numbers are percentages.

Due to rounding, not all percentages add to 100%.

For grades teaching, primary indicates pre-k through 5th grade; middle indicates sixth-grade through eighth-grade; and high school indicates ninth-grade through 12th grade.

Asterisks (*) indicate small base sizes ($n < 75$) and results should be considered directional only. Dashes (-) indicate that less than 1% of respondents provided a particular response.

State and District Budgets

Q. 70

Which of the following comes closest to your point of view? If the coronavirus outbreak continues to negatively impact the economy, resulting in significantly smaller education budgets as has happened during other economic downturns, any teacher layoffs should be:

	Total	TYPE OF SCHOOL		GRADES TEACHING				% LOW-INCOME STUDENTS		
		District	Charter*	Primary	Middle	High School	Com-bined*	0-33%	34-66%	67%+
Based on multiple factors, including both performance and seniority	64%	64%	65%	63%	65%	67%	63%	69%	63%	63%
Based on seniority	18%	19%	10%	19%	16%	16%	20%	14%	17%	22%
Based on teacher performance	18%	17%	26%	18%	20%	17%	17%	16%	20%	16%

State and District Budgets

Q. 71

What do you think are the best options if layoffs do occur in your district? Please select what you think is the best option. Next, select what you think is the second best option. Finally, select what you think should be the third best option.

Percent reporting top three options.

	Total	TYPE OF SCHOOL		GRADES TEACHING				% LOW-INCOME STUDENTS		
		District	Charter*	Primary	Middle	High School	Com-bined*	0-33%	34-66%	67%+
1. Avoid layoffs at schools serving vulnerable student populations	47%	46%	53%	50%	44%	45%	41%	35%	41%	61%
2. Layoff district or network staff before cutting teachers in school	50%	51%	43%	50%	52%	48%	50%	44%	52%	53%
3. Layoff "specials" teachers (e.g., art, music, gym) before classroom teachers	19%	19%	26%	21%	21%	16%	16%	23%	19%	17%
4. Offer "buyouts" to teachers nearing retirement (i.e., offering financial incentives to teachers to retire early), to reduce or eliminate teacher layoffs	78%	79%	66%	78%	79%	78%	74%	78%	75%	80%
5. Temporarily raise retirement or healthcare contributions for teachers and other district or charter network employees to reduce or eliminate teacher layoffs	30%	28%	49%	30%	25%	30%	37%	36%	30%	26%
6. Temporarily freeze teacher salaries	29%	29%	34%	25%	34%	32%	35%	33%	36%	21%
7. Temporarily freeze district or network staff salaries	47%	49%	29%	45%	46%	51%	47%	52%	47%	42%

Future Closures

Q. 72

In the event of any future extended school closings that require distance learning, what do you think is most important for districts or charter networks to do?

	Total	TYPE OF SCHOOL		GRADES TEACHING				% LOW-INCOME STUDENTS		
		District	Charter*	Primary	Middle	High School	Com-bined*	0-33%	34-66%	67%+
Have a plan in place to provide students with the necessary learning tools they would normally have at school (e.g., books, personal learning devices)	52%	52%	53%	54%	48%	52%	47%	51%	57%	48%
Have high-quality curricular tools for distance learning ready that teachers have received training on	20%	21%	19%	21%	18%	22%	22%	20%	16%	26%
Set clear guidance for teachers' roles during distance learning	17%	17%	17%	16%	16%	18%	14%	20%	15%	16%
Have a plan in place to ensure students have access to physical and mental health supports (e.g., meals, counselors)	11%	11%	12%	10%	18%	8%	17%	10%	12%	10%

About Educators for Excellence

Our nation's education system is leaving millions of students – including an overwhelming number of students of color and low-income students – unprepared for college, career, and life. Only one in 10 students from low-income households in the United States attains a bachelor's degree by the age of 25. Moreover, just 14% of black adults and 11% of Hispanic adults hold bachelor's degrees, compared with 24% of white adults. The result is an opportunity gap and divide along racial and class lines that threatens the future of our communities, economy, and democracy.

While research shows that classroom teachers are the single most important in-school factor in improving student achievement, their diverse voices are consistently left out of education policy decisions. Even though policymakers at every level of the system are talking about teachers, they rarely are talking with teachers.

Founded by public school teachers in 2010, Educators for Excellence is a growing movement of more than 30,000 educators, united around a common set of values and principles for improving student learning and elevating the teaching profession. With chapters in Boston, Chicago, Connecticut, Los Angeles, Minnesota, and New York, we work together to identify issues that impact our schools, create solutions to these challenges, and advocate for policies and programs that give all students access to a quality education.

Educators for Excellence is a nonprofit and proud to receive financial support from a diverse base of nonprofit, corporate, and family foundations as well as individual donors, including teachers and community members, who believe in the power of teacher-led change.

Our Vision

Educators for Excellence envisions an equitable and excellent education system that provides all students the opportunity to succeed and elevates the teaching profession.

Our Mission

Educators for Excellence ensures that teachers have a leading voice in the policies that impact their students and profession.
